DB/Infra: MySQL, MongoDB, Redis, AWS (EC2, S3), Docker, RabbitMQ
Frontend: JavaScript, HTML5, CSS3, jQuery, Bootstrap
Tools: Git, Bitbucket, Jira, Jenkins
Leadership: Team Management, Sprint Planning, Performance Reviews
Domain: Drop-shipping, Logistics, Courier Aggregation, SaaS Platforms

---

◆ EXPERIENCE

Team Lead – Shifto Pvt Ltd, Gurgaon
May 2024 – Present

- Directed development of multi-tenant drop-shipping platform supporting 100K+ SKUs.
- Boosted API performance by 40% using Redis caching and MongoDB indexing strategies.
- Implemented team-wide agile workflows, improving delivery timelines by 25%.
- Automated order sync between Shopify/WooCommerce, reducing manual effort by 70%.
- Deployed "Coborder" procurement module, streamlining vendor data ingestion and inventory updates.

Team Lead – NimbusPost Pvt Ltd, Gurgaon
May 2020 – Apr 2024

- Integrated 10+ courier partners via unified API, automating 80% of shipment assignments.
- Engineered wallet system handling ₹5Cr+ in monthly transactions with 99.99% uptime.
- Led agile team of 8 developers through CI/CD pipelines and code audits.

Tech Lead – MeraJob India, Gurgaon
Jul 2018 – Jan 2020

- Delivered scalable job-matching platform used by 3M+ registered candidates.
- Optimized backend architecture, achieving 35% faster page loads.
- Devised modular components for dynamic job search filters and matching algorithms.

Senior Developer & Project Coordinator – A R Bharti Softland Pvt Ltd & Others (NCR)
Nov 2010 – Jun 2018

- Supervised teams across 10+ client projects in ERP, CRM, and custom SaaS solutions.
- Collected business requirements and translated into scalable technical architecture.
- Championed code standardization, reducing QA defects by 30%.

Software Developer – Sugal and Damani Group, New Delhi
Jun 2008 – Nov 2010

- Built "Payworld" recharge and billing system used by 1K+ retailers.
- Developed secure payment integrations and reconciliation workflows.

◆ PROJECT HIGHLIGHTS

Sourceinfi (Drop-shipping Platform)
PHP, Node.js, MongoDB, Redis, RabbitMQ, AWS

- Built a scalable SaaS drop-shipping platform for suppliers and resellers across India.
- Engineered modular backend for catalog sync, reseller-specific pricing, and real-time inventory.
- Automated full order lifecycle: creation, payment handling, dispatch, and shipping updates.
- Integrated Shopify/WooCommerce APIs with webhook-based order synchronization.
- Implemented multi-wallet and commission system with transaction logs and payout support.
- Designed dashboards to monitor KPIs like order trends, revenue, top products, and delivery SLAs.

- Enabled role-based workflows for admins, resellers, and suppliers for platform-wide access control.

Shifto (Packers and Movers Platform)
Laravel, MySQL

- Developed lead intake, vendor pricing, and cost estimation workflows.
- Enabled performance reporting dashboard for business intelligence.

Ship.nimbuspost.com (Courier Aggregator Platform)

PHP, CodeIgniter, Redis, MySQL

- Created a unified courier integration layer connecting 20+ logistics providers.
- Developed smart courier selection logic based on weight, zone, and cost efficiency.
- Automated order intake from Shopify, Magento, and WooCommerce.
- Designed wallet-based billing with reconciliation for COD, returns, and weight disputes.
- Enabled performance dashboards for tracking courier success rates and SLA violations.
- Supported multi-warehouse shipping, label generation, and compliance tracking.

Coborder (Procurement & Inventory Management Platform)
Laravel, MongoDB

- Centralized procurement workflow to ingest vendor data via API and Excel.
- Automated procurement lifecycle, including requisitions, approval, and vendor scoring.
- Synchronized delivery status with warehouse inventory updates in real-time.

◆ EDUCATION

Master of Computer Applications (MCA) – GGS Indraprastha University, New Delhi – 2008
Bachelor of Computer Applications (BCA) – IGNOU, New Delhi – 2004

◆ AWARDS

🏆 Best Employer of the Year – Shifto Pvt Ltd, 2023
